[\[trick\] Membuat Web Service Extract Url website](#)

The screenshot displays the iMacros Browser interface. At the top, the 'Text Extraction Wizard' is active, showing configuration options: EXTRACT = TEXT, ATTR = CLASSbodytd, TYPE = TD, and POS = 1. The 'Extracted' field contains the text: 'This line is extracted. The second line is extracted, too.' A red arrow points from this field to a pink highlight on the web page below. The web page is 'ipswitch iMacros' and shows an 'Overview of EXTRACT command' section. A table lists examples of EXTRACT macro usage:

Example	Description
<pre>EXTRACT=TEXT,standart text extraction</pre>	TYPE=TEXT, standart text extraction
<pre>EXTRACT=HTML,extraction in html format. The line breaks (-br-) and formatting symbols (like -b- for bold) are also extracted. This can be helpful for further processing.</pre>	TYPE=HTM, extraction in html format. The line breaks (-br-) and formatting symbols (like -b- for bold) are also extracted. This can be helpful for further processing.
<pre>EXTRACT=HREF,link extraction or use TYPE=TITLE to extract the link title (the tooltip text).</pre>	TYPE=HREF, link extraction or use TYPE=TITLE to extract the link title (the tooltip text).
<pre>EXTRACT=IMG,extraction of image alt text (e.g. product name)</pre>	Extraction of the image ALT text (e.g. product name)

The text 'This line is extracted. The second line is extracted, too.' is highlighted in pink in the table, with a red circle around it. A red arrow points from the 'Extracted' field in the wizard to this highlight. The browser's status bar at the bottom shows 'Clicked image at 'http://wiki.imacros.net/upload/5/51/house.png'. Emulating IE11'.
